ANDREW BOKMAN

SENIOR PROCESS OPERATOR

Faribault, MN | a_bokman@proton.me | linkedin.com/in/andrew-bokman

SUMMARY

Process operator with 15+ years in food manufacturing. Led day-to-day processing on a multi-product cereal line, directing 4–5 operators, and qualified on multiple production lines. Currently works independently across several areas of a cheese and whey plant on 12-hour night shifts. Hands-on with startups, changeovers and shutdowns, HMI process monitoring, troubleshooting, CIP, sampling and operator training.

PROFESSIONAL EXPERIENCE

AGROPUR | Resource Operator II | Le Sueur, MN | Feb 2026–Present

- Cross-trained operator in a continuous cheese and whey plant on 12-hour 2-2-3 night shifts; independently qualified to run intake, HTST/packaging, starter and the cheese make room; train operators and provide fill-in supervisory coverage.
- Monitor and control silo levels, pumps, product flow and process conditions in Wonderware; switch silos and reconfigure pipe and hose connections for product routing and CIP.
- Take frequent process readings and make operating adjustments; monitor whey, permeate and lactose flows; troubleshoot at operator level, escalate equipment problems to maintenance and hand off open issues at shift change.
- Receive tankers at intake: collect samples, verify temperatures and perform antibiotic testing on incoming raw milk as an Industry Analyst; complete final weights, SAP entries and traceability records.
- Run CIP on tankers, silos and process circuits; perform Master Sanitation work, titrations, micro and analytical sampling, and pre-operational checks.

POST CONSUMER BRANDS | Processing Specialist | Northfield, MN | 2021–Jun 2024

- Led day-to-day processing on a multi-product cereal line producing 55,000–65,000 lb of finished product per 12-hour shift, directing 4–5 operators.
- Qualified on all three production lines in the business unit; also ran extruders, puffing guns and shredded-wheat equipment in the other two units.
- Ran campaigns of corn flakes, frosted flakes and Honey Bunches of Oats between major cleans, planning startups, changeovers and shutdowns.
- Set operating rate each shift, weighing equipment condition, process stability, product quality, inventory and pounds left to target.
- Diagnosed mill and process problems from how feed, roll condition, nip pressure, temperature and rate interact; restored stable production.
- Monitored the process from the HMI and responded to alarms, process deviations and equipment faults at operator level.
- Trained and coached processing operators on equipment, process and troubleshooting; coordinated with maintenance on faults beyond operator level.

POST CONSUMER BRANDS | Processing Operator | Northfield, MN | Jul 2019–2021

- Operated feeders, flaking mills, dryers and downstream equipment on a multi-stage cereal line through startups, changeovers and shutdowns.

HERDA'S MEAT PROCESSING | Senior Processing & Production Specialist | Faribault, MN | 2012–2019

- Regularly opened the shop and started daily production before the owner arrived; directed 2–3 employees and ran the operation in the owner's absence.
- Planned weekly production with the owner and scheduled future cattle processing within shop capacity; handled customer orders, pickups and payments.
- Worked hands-on across custom beef and seasonal pork production: cutting, grinding, packaging and wrapping to customer orders, plus bacon curing and smoking.

INNOVATIVE FOOD PROCESSORS | Processing Operator | Faribault, MN | 2008–2012

- Set up, ran and cleaned dry-food powder-processing equipment; calculated production-order quantities and yields.

MCLANE | Selector | Northfield, MN | 2006–2008

- Selected full-case customer orders by scanning labels to confirm slot, product and required quantity; built pallets and moved completed orders to docks with powered equipment while meeting accuracy and safety requirements.

SKILLS

Process operations: continuous and multi-stage processing, startups, changeovers and shutdowns, process monitoring and adjustment, troubleshooting, CIP and sanitation
Equipment: flaking mills, toasting, sugar coating, dryers, extruders, puffing guns, HTST, silos and pumps
Quality and testing: sampling, titrations, antibiotic testing, pre-operational checks, traceability records
Systems: Wonderware (HMI), SAP
Safety: LOTO · Confined Space · GMP

EDUCATION

B.S. Computer Science, Rasmussen University | In progress; started Oct 2026
A.S., Culinary Arts, Le Cordon Bleu | Mendota Heights, MN
