Skills

Operations
Process operation, startups, changeovers, shutdowns, readings and adjustments

Troubleshooting
Abnormal conditions, equipment and process problems, maintenance coordination

Sanitation & Testing
CIP, titrations, sampling, pre-op checks

Training & Coverage
Operator training, fill-in supervision, independent cross-trained coverage

Education

B.S. Software Engineering
Rasmussen University · in progress, Oct 2026–Present

A.S., Culinary Arts
Le Cordon Bleu, Mendota Heights

Systems

Wonderware · SAP

Safety

LOTO · Confined Space · GMP

Experience

Resource Operator II
AGROPUR
Feb 2026–Present
Le Sueur, MN

- **Cross-trained operator** in a continuous cheese and whey plant on 12-hour 2-2-3 night shifts; independently qualified to run intake, HTST, make room (EFVs, ACVs), bulk starter room and packaging; train operators and provide fill-in supervisory coverage.
- **Monitor and control** silo levels, pumps, product flow and process conditions in Wonderware; switch silos and reconfigure pipe and hose connections for product routing and CIP.
- **Receive tankers at intake: collect aseptic samples, verify temperatures and perform antibiotic testing; Industry Analyst certified; State of Minnesota–certified in bulk-hauler aseptic dairy sampling; complete final weights, SAP entries and traceability records.**
- **Run CIP** on tankers, silos and process circuits; perform Master Sanitation work, titrations, micro and analytical sampling, and pre-operational checks.

Processing Specialist · 2021–Jun 2024
POST CONSUMER BRANDS
Jul 2019–Jun 2024
Northfield, MN

- Led day-to-day processing on a multi-product cereal line producing 55,000–65,000 lb of finished product per 12-hour shift, directing 4–5 operators.
- Operated and troubleshot cereal-processing equipment including jet zones, mill rolls, slurry/coating systems, dryers, feeders, extruders, puffing guns and shredded-wheat equipment; planned startups, changeovers and shutdowns.
- Set production pace by weighing equipment condition, process stability, product quality, inventory and remaining targets, coordinating with maintenance, packaging and other departments to maintain production flow.
- Troubleshot issues across the entire processing phase, diagnosing equipment, process, product-quality and flow problems to restore stable production.

Processing Operator · Jul 2019–2021

- Operated feeders, flaking mills, dryers and downstream equipment on a multi-stage cereal line through startups, changeovers and shutdowns.

Manager · 2015–2019
HERDA'S MEAT PROCESSING
2012–2019
MN

- Ran day-to-day shop operations when the owner was absent, directing 2–3 employees and coordinating production, customer orders, pickups and payments.
- Planned weekly production with the owner, scheduled cattle and hog processing within shop capacity, trained employees and managed changing daily priorities.
- Performed the full processing operation hands-on, including slaughter, aging, carcass breakdown, custom cutting, grinding, sausage and bacon production, packaging, sanitation and equipment operation.

Processing Operator
INNOVATIVE FOOD PROCESSORS
2008–2012
MN

- **Set up, ran and cleaned** dry-food powder-processing equipment; calculated production-order quantities and yields.

Selector
MCLANE
2006–2008
Northfield, MN

- **Selected full-case orders**, scanning labels to confirm slot, product and quantity; built pallets and moved them to the dock with powered equipment.
